

Calculating value at VMAC

The following are the results of a statistical study of 25 consecutive incidents over one year from an actual VMAC client, whose employees are regularly involved in physical tasks like lifting, carrying, and driving.

We invite you to compare our data to your current injury loss data!

Averages	Category	Range
2.32	Average visits per incident	1-4
0	Days out of work	0
7.36	Average light duty days assigned per incident	0-21
\$407.36	Average amount paid per incident (excludes PT and MRI/CT)	\$184-\$893
7.56	Average days from first visit to discharge	0-27
4%	MRI utilization	0-2
4%	Specialist referral	2 total
